

# Desarrollo WEB Parte #2

Fernando Rizzato Lead Software Consultant, *Latin America* 

#### **AGENDA**

- Conceptos
  - Comunicación HTTP
  - Aplicaciones Desktop frente a Aplicaciones WEB
  - Browser: HTML, CSS, JavaScript
- Arquitecturas y Posibilidades
  - Stateful versus Stateless
  - Web Server y App Server
- Demos
  - #1: WebBroker
  - #2: IW + BootStrap
  - #3: RAD Server + Ext JS

#### **BOOTSTRAP**

- El Bootstrap fue desarrollado por Mark Otto y Jacob Thornton en Twitter, y se convirtió en Open Source en agosto de 2011 vía GitHub.
- Popular biblioteca de componentes front-end que permite la creación de proyectos web responsivos.
- Un conjunto de herramientas de código abierto para desarrollo con HTML, CSS y JS.
- Cree prototipos rápidamente de sus ideas o cree su aplicación completa con sistemas de tablas responsivas, extensos componentes pre-construidos y plugins poderosos creados con jQuery.

### CÓMO OBTENER EL BOOTSTRAP

- Si desea descargar y mantener el Bootstrap usted mismo, vaya a getbootstrap.com y siga las instrucciones allí.
- O utilice vía MaxCDN.

```
<!-- Latest compiled and minified CSS -->
k rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css">
<!-- jQuery library -->
<script src="https://ajax.googleapis.com/ajax/libs/jquery/3.2.1/jquery.min.js"></script>
<!-- Latest compiled JavaScript -->
<script src="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/js/bootstrap.min.js"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></
```

#### **INTRAWEB**

- Framework para desarrollo web en Delphi/C++
- Paradigma de desarrollo muy cerca de las aplicaciones de escritorio (al estilo Delphi!)
- Gratis en Delphi/C++ Professional+
- Edición "Ultimate" disponible para otras opciones de implementación y recursos
- Muy fácil de empezar
- Servidor Windows: ISAPI, Servicio o Stand Alone

#### **EDICIONES DEL INTRAWEB**

- ATENCIÓN: Actualizar su versión antes de empezar!
  - https://www.atozed.com/intraweb/bundled
- Matriz de recursos de cada edición
  - http://ww2.atozed.com/IntraWeb/FeatureMatrixXIV.EN.aspx

	Evaluation	Personal	Standard	Ultimate
Integrated Page Mode	×	X	X	Х
RSS Feeds	×	×	×	×
Static Content	X	X	X	X
URL Mapping (Content Handlers)	X	X	X	X
Self Contained WebServer Deployment (StandAlone Server)	x	X	×	х
Windows Service Deployment	-		X	X
ISAPI Deployment	X	-		X
ASPX Deployment	X	-		X
SSL Encyrption	-	-		X
IP Binding	-	-		X
Priority Support	-	-		X
Access to Source Code (Most)	-	-		X
Concurrent Session Limit	-	5		-
Application Mode	X	X	X	X
<b>Authentication Components</b>	X			X
Session Inactivity Timeout  * Actual session length is unlimited in all editions.	Configurable	20 minutes	20 minutes	Configurable
Maximum Session Time	No Limit	No Limit	No Limit	No Limit
<b>Evaluation Notice</b>	x	-		-
